Earnings Release

CHARLOTTE BAY, July 14, 2026 - Meridian Harbor Financial Corp. today reported net income for the second quarter of 2026 of \$6.54 billion, or \$4.48 per diluted share, compared with net income of \$6.12 billion, or \$4.09 per share, in the second quarter of 2025. Reported revenue was \$22.48 billion, up 5.4% year-on-year.

Second-quarter highlights

- Net income \$6.54 billion; EPS \$4.48; ROTCE 25%
- Revenue \$22.48 billion, up 5.4% YoY; NII \$12.56 billion, up 4.5%
- Average loans up 6% YoY; average deposits up 4% YoY
- Credit costs \$1.92 billion: net charge-offs \$1.65 billion, net reserve build \$270 million
- Standardized CET1 ratio 15.1%; returned \$4.6 billion to shareholders

"Our businesses performed well this quarter. Clients are active, credit is behaving as we expected and our balance sheet has never been stronger. We remain alert to a wide range of economic outcomes and continue to manage the company to be ready for all of them." - Eleanor V. Ashcombe, Chairman and CEO

Firmwide results

Net interest income was \$12.56 billion, up 2.0% from the prior quarter, reflecting one additional day, Card loan growth and higher deposit balances, partly offset by lower deposit margins following the 25 basis point policy rate reduction in March. Noninterest revenue was \$9.92 billion, down 3.1% sequentially from a seasonally strong first quarter in Markets, and up 6.6% year-on-year on higher investment banking and asset management fees.

Noninterest expense was \$12.14 billion, up 3.3% year-on-year, driven by compensation, including growth in front-office and technology headcount, and continued technology investment, partly offset by lower legal expense. The overhead ratio was 54.0%.

The provision for credit losses was \$1.92 billion, reflecting net charge-offs of \$1.65 billion and a net reserve build of \$270 million, primarily in Card on loan growth. The allowance for loan losses was \$16.38 billion, or 2.15% of period-end loans.

Outlook

Management now expects full-year 2026 net interest income of approximately \$50.5 billion, up from the approximately \$50.2 billion expectation provided in January, reflecting stronger deposit balances. Adjusted noninterest expense is expected to be approximately \$49.5 billion, and the Card net charge-off rate is expected to be approximately 3.6%. The outlook assumes the market-implied forward rate curve as of June 30, 2026.

Segment results

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Consumer & Community Banking - net revenue	10,520	10,310	10,090	2.0%	4.3%
Consumer & Community Banking - net income	3,210	3,150	3,010	1.9%	6.6%
Commercial & Investment Bank - net revenue	8,480	8,870	8,110	(4.4%)	4.6%
Commercial & Investment Bank - net income	2,740	2,890	2,510	(5.2%)	9.2%
Asset & Wealth Management - net revenue	3,560	3,440	3,220	3.5%	10.6%
Asset & Wealth Management - net income	960	910	870	5.5%	10.3%
Corporate - net revenue	(80)	(70)	(90)	(14.3%)	11.1%
Corporate - net income	(370)	(390)	(270)	5.1%	(37.0%)
Firmwide net income	6,540	6,560	6,120	(0.3%)	6.9%

Consumer & Community Banking reported net income of \$3.21 billion, up 7% year-on-year, on revenue growth of 4%. Card loans grew 9% and card spend grew 7%. Deposits grew 2% sequentially. The Card net charge-off rate was 3.58%, in line with guidance.

Commercial & Investment Bank reported net income of \$2.74 billion. Investment banking fees rose 14% year-on-year, led by equity and debt underwriting. Markets revenue was \$4.6 billion, up 4% year-on-year. Payments revenue grew 8%, with real-time payment volumes up 64%.

Asset & Wealth Management reported net income of \$0.96 billion, up 10%, with record client assets of \$3.31 trillion and long-term net inflows of \$41 billion.

Corporate reported a net loss of \$370 million.

Capital and liquidity

The Standardized CET1 ratio was 15.1%, flat versus the prior quarter, as net income generation was offset by capital distributions and RWA growth of 1.1%. The Firm repurchased \$3,000 million of common stock and paid common dividends of \$1.15 per share. The supplementary leverage ratio was 6.1% and the average LCR was 115%.

The Firm received its preliminary 2026 stress capital buffer from the Federal Reserve on June 27, 2026. Based on the preliminary results, the Firm expects its SCB to remain at 3.2% from October 1, 2026.

Financial Supplement

Consolidated Financial Highlights

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Total net revenue	22,480	22,550	21,330	(0.3%)	5.4%
Net interest income	12,560	12,310	12,020	2.0%	4.5%

Segment detail - Consumer & Community Banking

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Net revenue	10,520	10,310	10,090	2.0%	4.3%
Net income	3,210	3,150	3,010	1.9%	6.6%
Average loans	421,900	417,100	409,800	1.2%	3.0%
Average deposits	628,400	621,300	607,900	1.1%	3.4%
Card loans, period end	145,600	140,200	133,700	3.9%	8.9%
Debit and credit card sales volume	412,300	386,900	385,100	6.6%	7.1%

- Banking & Wealth Management revenue of \$5.2 billion, down 2% YoY on deposit margin compression, partly offset by higher deposit balances and client investment assets.
- Home Lending revenue of \$0.9 billion, up 5% YoY on higher production margins; originations of \$11.8 billion.
- Card Services & Auto revenue of \$4.4 billion, up 11% YoY on higher Card net interest income from loan growth.
- Card net charge-off rate of 3.58%, compared with 3.39% in 2Q25; 30+ day delinquency rate of 2.24%.
- Active mobile customers of 63.0 million, up 7% YoY; 81% of new deposit accounts opened digitally.

Management commentary. Consumer spending remained resilient across income bands, with discretionary categories such as travel and dining growing faster than non-discretionary spend. Deposit balances grew for the third consecutive quarter as customers shifted cash back from money market funds into higher-yielding savings and CD products, which carries a lower margin than checking balances.

Card loan growth reflects strong new account origination in the second half of 2025 maturing into revolving balances. These vintages are performing in line with underwriting expectations. Credit decisions for new card accounts are made through the Credit Decisioning API (API-09), and the expected lifetime losses on the resulting balances are reserved through the CECL model as the loans are booked.

Branch expansion continued, with 31 new branches opened in the quarter in expansion markets in the Southeast and Mountain West. The new-branch cohort from 2023 has reached break-even.

Segment detail - Commercial & Investment Bank

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Net revenue	8,480	8,870	8,110	(4.4%)	4.6%
Net income	2,740	2,890	2,510	(5.2%)	9.2%
Average loans	279,200	274,600	265,300	1.7%	5.2%
Average deposits	331,500	326,800	312,400	1.4%	6.1%
Investment banking fees	1,820	1,760	1,600	3.4%	13.8%
Markets revenue	4,610	5,080	4,430	(9.3%)	4.1%

- Investment banking fees of \$1.82 billion, up 14% YoY, with gains in equity and debt underwriting; wallet share of 8.1%.
- Markets revenue of \$4.6 billion, up 4% YoY: Fixed Income Markets \$2.9 billion, Equity Markets \$1.7 billion.
- Payments revenue of \$2.5 billion, up 8% YoY; real-time payments volume up 64% following the expansion of the Real-Time Payments API (API-04) to middle-market clients.
- Lending revenue of \$0.9 billion; average loans of \$279 billion, up 5% YoY.
- Provision for credit losses of \$260 million, including office CRE net charge-offs of \$90 million.

Management commentary. Client engagement was strong across regions. The investment banking pipeline is up year-on-year, with particularly strong activity in technology and healthcare M&A. Sponsor activity improved as financing markets remained open. In Markets, Fixed Income benefited from client activity in rates and securitized products, while Equity Markets were lower than a record first quarter in derivatives.

Payments remains a strategic priority. The Real-Time Payments API (API-04) and the Payments Initiation API (API-03) are now integrated with the top five ERP platforms used by middle-market clients, and 2,400 clients went live on API-based payments in the quarter. Each payment is screened by the Fraud Risk Signals API (API-08) before release.

Office CRE remains the area of greatest credit attention. Criticized office loans were \$3.1 billion, down from \$3.6 billion at year end, and the office portfolio carries an allowance coverage of 9.8%.

Segment detail - Asset & Wealth Management

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Net revenue	3,560	3,440	3,220	3.5%	10.6%
Net income	960	910	870	5.5%	10.3%
Assets under management (\$bn)	2,270	2,210	1,990	2.7%	14.1%
Client assets (\$bn)	3,310	3,240	2,960	2.2%	11.8%
Average loans	63,800	62,900	59,700	1.4%	6.9%
Average deposits	238,100	234,400	226,900	1.6%	4.9%

- Asset management fees of \$2.48 billion, up 10% YoY on higher average market levels and net inflows.
- Long-term net inflows of \$41 billion and liquidity net inflows of \$18 billion.
- Assets under management of \$2.27 trillion and client assets of \$3.31 trillion, both records.
- Pre-tax margin of 36%; ROE of 34%.

Management commentary. Record client assets reflect both market appreciation and continued net new money, particularly in Global Private Bank and in active ETFs, where the Firm ranks among the top five issuers by net flows. 84% of ten-year long-term mutual fund AUM performed above the peer median.

Advisor headcount increased 5% year-on-year. Lending to private bank clients, primarily securities-based lending and mortgages, grew 7% with negligible credit losses.

Alternatives fundraising remained strong, with \$9 billion raised across private credit, infrastructure and real estate strategies in the quarter.

Segment detail - Corporate

(in millions, except per share and ratios)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Net revenue	(80)	(70)	(90)	(14.3%)	11.1%
Net income	(370)	(390)	(270)	5.1%	(37.0%)

- Net revenue of \$(80) million, including investment securities losses of \$40 million.
- Net interest income in Treasury/CIO benefited from reinvestment of maturing securities at higher yields.
- Expense of \$480 million, primarily centrally managed technology and legal costs not allocated to segments.

Management commentary. Treasury/CIO continued to reinvest maturing securities into agency mortgage-backed securities and U.S. Treasuries at yields above the run-off yield, supporting Firmwide NII. The investment securities portfolio duration was approximately 3.6 years at quarter end.

Treasury/CIO maintains the Firm's interest rate risk positioning within Board-approved limits, measured using the Net Interest Income Sensitivity Model (MDL-ALM-014), and manages capital distributions within the plan produced by the Capital Planning & Stress Projection Model (MDL-CAP-003).

Credit Trends

Credit performance remained consistent with management's expectations. Consumer credit continued to normalize gradually, led by Card, while wholesale credit was stable, with losses concentrated in office CRE. Nonperforming assets were \$5.4 billion, or 0.71% of loans.

Net charge-offs by portfolio (in millions)	2Q26	1Q26	2Q25	vs 1Q26	vs 2Q25
Credit Card	1,270	1,200	1,110	5.8%	14.4%
Residential Mortgage	10	10	10	0.0%	0.0%
Auto	100	110	100	(9.1%)	0.0%
Commercial Real Estate	90	110	80	(18.2%)	12.5%
Commercial & Industrial	160	140	130	14.3%	23.1%
Other Consumer & Wholesale	20	20	20	0.0%	0.0%
Total net charge-offs	1,650	1,590	1,520	3.8%	8.6%

Allowance for loan losses roll-forward (in millions)	2Q26	1Q26
Beginning balance	16,110	15,920
Net charge-offs	(1,650)	(1,590)
Provision for loan losses	1,920	1,780
Ending balance	16,380	16,110
Allowance to period-end loans	2.15%	2.14%

The allowance is estimated using the CECL Lifetime Expected Credit Loss Model (MDL-CR-007). Scenario weights were unchanged from year end (Upside 20%, Baseline 50%, Downside 30%). The baseline scenario assumes U.S. unemployment peaking at 4.5% in the first quarter of 2027, slightly higher than the 4.4% assumed at year end. The year-end allowance by segment and the model's sensitivity to scenario weights are disclosed in Note 6 of the 2025 Annual Report.

Capital and Capital Planning

CET1 capital was \$101.2 billion and Standardized RWA was \$668.4 billion, for a CET1 ratio of 15.14%. The Firm's capital plan, produced with the Capital Planning & Stress Projection Model (MDL-CAP-003) using June 30, 2026 starting capital, projects:

- Baseline: CET1 ratio rising to 16.15% by 3Q28 after \$27.0 billion of share repurchases (\$3.0 billion per quarter) and dividends of \$1.15 per share per quarter.
- Severely adverse: minimum CET1 ratio of 12.90%, a peak-to-trough decline of 2.24%, with buybacks suspended.
- Indicative SCB of 3.18% (peak-to-trough decline plus 0.94% of dividends), consistent with the preliminary supervisory SCB of 3.2%.
- Excess CET1 above the 13.0% management target of approximately \$23.0 billion by 3Q28, providing capacity for organic growth, additional distributions or acquisitions.

Source: Capital_Planning_Model.xlsx (MDL-CAP-003), sheets Baseline_Projection and Stress_Projection.

CET1 requirement stack		2Q26
Regulatory minimum		4.5%
Stress capital buffer		3.2%
G-SIB surcharge		2.5%
Countercyclical buffer		0.0%
Total CET1 requirement		10.2%
Management target		13.0%

Average Balance Sheet, Yields and Rates

Quarterly averages; yields and rates are annualized and presented on a taxable-equivalent basis.

2Q26 (in millions)	Average balance	Interest	Yield / rate
Deposits with banks and fed funds sold	251,300	2,280	3.64%
Securities purchased under resale agreements	131,800	1,190	3.62%
Investment securities	176,400	1,770	4.02%
Trading assets - debt instruments	101,900	1,050	4.13%
Loans	756,900	13,290	7.04%
All other interest-earning assets	33,700	260	3.10%
Total interest-earning assets	1,452,000	19,840	5.48%
Interest-bearing deposits	758,200	4,690	2.48%
Repurchase agreements and short-term borrowings	82,600	790	3.84%
Long-term debt	88,100	1,060	4.83%
Other interest-bearing liabilities	62,300	740	4.76%
Total interest-bearing liabilities	991,200	7,280	2.95%
Net interest income / net interest yield		12,560	3.47%

Loan yields declined 9 basis points sequentially, reflecting the March policy rate reduction on floating-rate C&I and CRE loans, partly offset by mix shift toward Card. The cost of interest-bearing deposits fell 7 basis points; the cumulative interest-bearing deposit beta since the start of the easing cycle is 49%, slightly above the 45% consumer and below the 75% wholesale betas assumed in the Net Interest Income Sensitivity Model, consistent with the product mix.

Loans and Deposits Detail

Period-end balances (in millions)	2Q26	1Q26	2Q25
Credit card	145,600	140,200	133,700
Residential mortgage	220,900	219,800	216,400
Auto	66,100	65,400	63,800
Commercial real estate	100,400	99,300	96,900
Commercial & industrial	177,600	176,000	170,100
Other consumer & wholesale	50,800	51,200	48,900
Total loans	761,400	751,900	729,800
Consumer deposits	668,900	663,700	652,300
Wholesale deposits	362,700	361,100	347,800
Total deposits	1,031,600	1,024,800	1,000,100

Consumer Credit Quality

Delinquency and loss metrics	2Q26	1Q26	2Q25
Card 30+ day delinquency rate	2.24%	2.29%	2.15%
Card 90+ day delinquency rate	1.14%	1.19%	1.09%
Card net charge-off rate	3.58%	3.55%	3.39%
Residential mortgage 30+ day delinquency rate	0.69%	0.71%	0.73%
Residential mortgage weighted-average current LTV	50%	51%	52%
Auto 30+ day delinquency rate	1.52%	1.58%	1.49%
Auto net charge-off rate	0.61%	0.68%	0.60%
Consumer nonaccrual loans (\$mm)	2,410	2,380	2,290

Card delinquencies improved seasonally in the second quarter. Early-stage roll rates for the 2025 vintages are tracking the loss curves used in underwriting. Pool-level PD and LGD estimates delivered by the Credit Risk Scoring API (API-10) were refreshed in June and are reflected in the quarter-end allowance.

Wholesale Credit Exposure by Industry

Industry (in billions)	Credit exposure	Investment grade %	Criticized	NCOs 2Q26 (\$mm)
Real estate - multifamily	\$84.1	71%	\$1.9	5
Real estate - office	\$15.2	38%	\$3.1	90
Real estate - other	\$37.8	58%	\$1.2	0
Technology, media & telecom	\$131.6	73%	\$2.4	40
Consumer & retail	\$119.0	61%	\$3.0	55
Industrials	\$104.3	66%	\$1.7	20
Healthcare	\$82.5	72%	\$1.1	10
Banks & finance companies	\$96.2	86%	\$0.4	0
Oil & gas and utilities	\$71.8	68%	\$0.8	5
Asset managers	\$88.4	84%	\$0.2	0
All other	\$383.1	79%	\$4.6	25
Total wholesale	\$1,214.0	74%	\$20.4	250

Liquidity Coverage Ratio Detail

Average, 2Q26 (in millions)	Unweighted	Weighted
High-quality liquid assets (HQLA)		292,300
Level 1 (cash, central bank reserves, Treasuries)		221,900
Level 2A and 2B		70,400
Retail and small business deposit outflows	668,900	41,800
Unsecured wholesale funding outflows	421,300	171,400
Secured funding and derivative outflows		38,600
Commitment and other outflows		131,900
Total cash outflows		383,700
Total cash inflows		(129,500)
Net cash outflows		254,200
Liquidity coverage ratio		115%

HQLA and cash flow projections are compiled daily from the Treasury Liquidity Positions API (API-15). The Firm also maintains significant additional liquidity in the form of unencumbered securities and borrowing capacity at the Federal Home Loan Banks and the Federal Reserve discount window, totalling approximately \$560 billion of total liquidity resources at quarter end.

Net Interest Income Outlook and Rate Sensitivity

Net interest income sensitivity is measured with the Net Interest Income Sensitivity Model (MDL-ALM-014), which applies instantaneous parallel rate shocks to a static balance sheet. The Firm remains modestly asset-sensitive. The table below reproduces the year-end 2025 sensitivity disclosed in the Annual Report; the June 30, 2026 sensitivity was directionally similar, with a +100 bp shock increasing 12-month NII by approximately \$1.4 billion.

12-month NII sensitivity (Dec 31, 2025, in millions)	Change in NII	% of base NII
Down 200 bps parallel shock	(3,017)	(6.0%)
Down 100 bps parallel shock	(1,508)	(3.0%)
Up 100 bps parallel shock	1,508	3.0%
Up 200 bps parallel shock	3,017	6.0%

Drivers of the 2026 NII outlook. Relative to 2025, NII is expected to benefit from Card loan growth (approximately +\$1.1 billion), reinvestment of maturing securities at higher yields (+\$0.6 billion) and deposit growth (+\$0.5 billion), partly offset by the effect of lower policy rates on deposit margins (-\$1.0 billion) and continued migration to higher-yielding deposit products (-\$0.4 billion). Deposit betas used in the model - 0.45 for consumer interest-bearing and 0.75 for wholesale interest-bearing deposits - were re-calibrated in the first quarter and remained unchanged.

Bars show the 2025 starting point, individual drivers and the updated outlook of ~\$50.5 billion (includes ~\$1.1 billion of other balance sheet effects not shown separately).

Technology and Digital Update

The Firm continues to modernize its technology estate and open its platform to clients. During the quarter, the Developer Platform processed an average of 4.4 billion API calls per month, up 21% year-on-year, with 99.98% availability. Highlights by API family:

API	Monthly calls 2Q26 (mm)	YoY growth	Availability	Key consumers
API-01 Accounts API	1,140	18%	99.99%	Mobile app, aggregators
API-02 Transactions API	1,320	22%	99.98%	Mobile app, aggregators, Fraud
API-03 Payments Initiation API	310	17%	99.98%	Corporate clients, ERP connectors
API-04 Real-Time Payments API	205	64%	99.99%	Corporate & small business clients
API-05 Wire Transfer API	41	9%	99.99%	CIB clients
API-06 Card Management API	260	15%	99.97%	Mobile app, fintech partners
API-08 Fraud Risk Signals API	690	24%	99.99%	Authorizations, RTP, wires
API-10 Credit Risk Scoring API	12	6%	99.95%	CECL model, capital, monitoring
API-12 Market Data API	310	11%	99.99%	Trading, NII model, fair value
API-16 Regulatory Reporting API	0.4	3%	99.90%	Capital model, FR Y-9C, Pillar 3

In May the Firm released version 3.2 of the Payments Initiation API, adding ISO 20022 structured remittance data, and launched a sandbox environment for the Credit Decisioning API for point-of-sale lending partners. The Firm also completed migration of the Macroeconomic Scenario API to the strategic data platform, reducing scenario-load time for the CECL and capital planning models from six hours to under forty minutes.

Earnings Call Highlights - Analyst Q&A

Summary of selected questions and management responses from the July 14, 2026 conference call. Responses are paraphrased for brevity.

Deposit trends

Analyst: Can you talk about deposit pricing and how much further deposit margins can compress if the Fed cuts twice more?

Rajiv N. Castellano: We have assumed two more 25 basis point cuts in our outlook. Our models assume betas of about 45% on consumer interest-bearing and 75% on wholesale interest-bearing balances on the way down, and so far realized betas are tracking those assumptions. The bigger swing factor is mix: if customers keep moving from checking to savings and CDs, that costs us more than the rate cuts themselves.

NII sensitivity

Analyst: You remain asset-sensitive. Why not add more duration to protect NII in a down-rate scenario?

Helen T. Mbeki: We have been adding duration, which is why we took securities losses last year. A 200 basis point decline would reduce NII by roughly 6% on a static basis, which is inside our 7% Board limit. We would rather keep flexibility than lock in today's yields, and our dynamic simulations, which include management actions, show a smaller impact.

Card credit

Analyst: Card charge-offs are at 3.58%. Are you comfortable with the reserve, and what would change it?

Dana K. Whitfield: Yes. We hold a Card allowance of roughly 6% of loans, which covers almost two years of current charge-offs. The allowance is driven mainly by loan growth and by our scenario weights. If we moved entirely to the downside scenario, the Firmwide allowance would rise by over \$4 billion, so the weighting matters more than small changes in the baseline.

Capital deployment

Analyst: You have over \$20 billion of excess capital above your target by 2028. Why not buy back more?

Rajiv N. Castellano: Our capital model shows the excess building, but we are deliberately cautious. There is still uncertainty about the final capital rules, and we would rather deploy capital into client growth. We will revisit the buyback pace after the final SCB is confirmed in August.

Office CRE

Analyst: How much more pain is left in office real estate?

Dana K. Whitfield: Criticized office loans are down for the second quarter in a row, and our allowance coverage on office is close to 10%. We expect losses to remain elevated but manageable; office is about 2% of total loans.

Technology and APIs

Analyst: What is the payoff from the API platform beyond client products?

Marcus O. Lindqvist: The same governed APIs we sell to clients feed our risk models. For example, moving the Macroeconomic Scenario API to our strategic platform cut the scenario load for the CECL and capital models from six hours to forty minutes, which lets us run more scenarios and close the quarter faster with better controls.

Non-GAAP Financial Measures

In addition to U.S. GAAP results, management reviews results on a managed basis and uses certain non-GAAP measures, including ROTCE, tangible book value per share and adjusted expense. These measures are not a substitute for GAAP measures and may not be comparable to similarly titled measures used by other companies.

Reconciliation (in millions)	2Q26	1Q26	2Q25
Total net revenue (reported)	22,480	22,550	21,330
Fully taxable-equivalent adjustment	130	130	140
Total net revenue (managed)	22,610	22,680	21,470
Common stockholders' equity (average)	119,300	117,900	111,600
Less: goodwill and identifiable intangibles, net of DTL	(16,300)	(16,330)	(16,410)
Tangible common equity (average)	103,000	101,570	95,190
Net income applicable to common stockholders	6,280	6,300	5,850
ROTCE (annualized)	24%	25%	25%

Five-Quarter Trend Summary

Key metrics	2Q25	3Q25	4Q25	1Q26	2Q26
Total net revenue (\$mm)	21,330	21,320	22,040	22,550	22,480
Net interest income (\$mm)	12,020	12,200	12,390	12,310	12,560
Noninterest expense (\$mm)	11,750	11,690	12,060	12,390	12,140
Provision for credit losses (\$mm)	1,640	1,710	1,890	1,780	1,920
Net income (\$mm)	6,120	6,210	6,310	6,560	6,540
Diluted EPS (\$)	4.09	4.20	4.33	4.48	4.48
ROTCE	24%	25%	25%	25%	24%
CET1 ratio (Standardized)	14.9%	15.0%	15.1%	15.1%	15.1%
Loans, period end (\$bn)	729.8	736.0	742.3	751.9	761.4
Deposits, period end (\$bn)	1,000.1	1,004.8	1,012.4	1,024.8	1,031.6
Allowance for loan losses (\$mm)	15,640	15,780	15,920	16,110	16,380
Net charge-off rate	0.84%	0.83%	0.85%	0.86%	0.88%
Headcount	212,800	213,900	214,600	215,300	216,100
API calls per month (bn)	3.6	3.8	4.1	4.2	4.4

Revenue and net income have grown steadily over the last five quarters, supported by loan and deposit growth and by the recovery in capital markets activity. The CET1 ratio has remained above 14.9% throughout while the Firm returned approximately \$4.6 billion of capital per quarter. Credit costs have risen in line with Card loan growth and the gradual normalization of consumer charge-off rates.

Notes on Presentation and Glossary

- All amounts are in millions of U.S. dollars unless otherwise noted. Totals may not sum due to rounding.
- Segment results are presented on a managed basis; Corporate includes Treasury/CIO and Other Corporate.
- Average balances are daily averages. Period-end balances are as of the last day of the quarter.
- Regulatory capital ratios are estimated and subject to finalization in the Firm's FR Y-9C filing, which is prepared from data delivered by the Regulatory Reporting API (API-16).
- References to models (MDL-xxx) and APIs (API-xx) correspond to entries in the Firm's model inventory and Developer Platform catalog. The models are also described in the 2025 Annual Report and Pillar 3 Disclosures.

Term	Definition
2Q26 / 1Q26 / 2Q25	Second quarter 2026, first quarter 2026, second quarter 2025.
Adjusted expense	Noninterest expense excluding legal expense and the FDIC special assessment.
Card NCO rate	Annualized Card net charge-offs divided by average Card loans.
Deposit beta	Proportion of a change in policy rates passed through to deposit rates.
Overhead ratio	Noninterest expense divided by total net revenue.
Real-time payments	Instant, irrevocable account-to-account payments settled 24x7.
ROTCE	Annualized net income applicable to common stockholders divided by average tangible common equity.
SCB	Stress capital buffer.
Wallet share	Firm's share of global investment banking fees.

Forward-looking statements. This release contains forward-looking statements, including the 2026 outlook for net interest income, expense and Card net charge-offs, and capital projections. These statements are subject to risks and uncertainties, and actual results may differ materially.
