

Organizational Announcement: Realignment of Cross-Border Network Integration

From: Gregory Hall, MD - CIO Payments & Treasury Technology | To: PTT Leadership, Treasury Management Products, Payment Operations

Document ID	CNB-MEMO-2026-09
Version / Status	1.0 / Issued
Document owner	Office of the CIO, Payments & Treasury Technology
Approver(s)	Gregory Hall
Effective / Last reviewed	Issued 2026-09-02; effective 2026-10-01
Classification	INTERNAL
Related documents	CNB-ORG-PTT-2026-06 (to be refreshed Q4); GTSI-0112

Team,

As cross-border volumes grow and Swift's ISO 20022 roadmap continues beyond the end of MT/MX coexistence, we are consolidating our cross-border network capabilities under one leader. Effective **October 1, 2026**, the following changes take effect.

1. What is moving

Capability	From	To	Accountable leader
Swift Alliance Gateway, gpi Connector (SYS-PNG-GPI) and gpi Tracker integration	Payment Networks Engineering (Raj Malhotra)	Global Transaction Services Integration (Elena Vasquez)	Omar Siddiqui (EM); Hannah Lindqvist (Tech Lead)
Swift API gateway (Microgateway), SwiftNet PKI service accounts	Payment Networks Engineering	GTSI	Hannah Lindqvist
International wire tracking roadmap (incl. any client-facing gpi capability)	Payment Networks Engineering	GTSI	Elena Vasquez; business sponsor Laura Kim

2. What is not moving

- The **Fedwire Funds Connector (SYS-PNG-FFC)**, including the net.fedwire.ack.v1 and net.fedwire.inbound.v1 topics, remains with Payment Networks Engineering under Raj Malhotra (Brian Walsh, EM).
- Raj Malhotra additionally assumes ownership of the FedNow and RTP connectors from 2026-11-01.

3. People changes

- Tomasz Nowak (Senior Engineer, gpi Connector) transfers to GTSI and reports to Omar Siddiqui.
- PNE on-call remains secondary support for SYS-PNG-GPI until **2026-12-15**, when knowledge transfer (GTSI-0112) completes.

4. How to engage

From October 1, all new requests for gpi data, Swift Tracker usage, or international wire status capabilities should be raised in Jira project **GTSI** and directed to Omar Siddiqui. Requests already logged against PNE (project PNG) will be triaged by GTSI during knowledge transfer; please do not open new PNG tickets for gpi topics. The PTT Organization & Ownership Directory (CNB-ORG-PTT-2026-06) will reflect these changes in its Q4 refresh.

5. Roadmap note

GTSI will own the gpi Tracker Real-Time Service initiative (GTSI-0107). It is not funded for 2026; discovery is planned for 2027-Q2 subject to the 2027 portfolio review. Teams with near-term needs for gpi data should engage GTSI early so requirements can inform discovery. GTSI is also responsible for the Swift Tracker API contract renewal due 2027-01-31 (GTSI-0115).

Thank you to Raj and the PNE team for building and running these services, and to Elena's team for taking them forward.

Gregory Hall

Managing Director, CIO Payments & Treasury Technology
