

Post-Implementation Review: Wire Status Lite Pilot and Incident INC-2024-1182

Lessons from the 2024 attempt to provide near-real-time wire status in CBO

Document ID	PIR-2024-07
Version / Status	1.1 / Final
Document owner	Tom Becker, EM - CBO Wire Center (facilitated by Enterprise Architecture)
Approver(s)	Anjali Deshpande; Raymond Ortiz; Denise Carter
Effective / Last reviewed	2024-07-15
Classification	INTERNAL - CONFIDENTIAL

1. Summary

Wire Status Lite (CBO-3120) piloted auto-refreshing wire status for 60 clients from January to May 2024. The browser refreshed each visible wire's status from PPH v1 every 30 seconds. On **2024-05-31** (month-end) pilot traffic plus production refreshes drove ~85 TPS to the v1 status API, exhausting the PPH API thread pool and delaying wire release for 47 minutes. The pilot was terminated and the epic closed.

2. Impact

Measure	Value
Wires delayed	1,240
Wires released after the 6:00 p.m. ET Fedwire customer cutoff (value next day)	312
Clients compensated (interest claims)	14 clients, \$41,800
Regulatory notification	Not required (no data exposure)

3. What we learned about clients

- 37% of surveyed pilot users believed 'Processed' meant the beneficiary had received the funds.
- Users most valued: knowing the wire left CNB, the Fed reference for their beneficiary, and when international wires were credited.
- Users asked why wires were held; Treasury Support could not explain without FCC guidance.

4. Root causes

1. Polling architecture against a shared synchronous API with no client-side backoff.
2. No capacity test at month-end volumes.
3. Status semantics were not validated with Compliance or Legal before exposure.

5. Actions

Action	Owner	Status
Rate-limit PPH v1 status API to 20 TPS shared	PPH	Done 2024-06
Adopt event-driven status pattern (became ADR-PAY-019)	EA	Done 2024-06
Build a reusable status projection service in CBO	CBO Platform	Delivered for ACH in 2025 (CBO-3815)
Validate client-facing status terminology with FCC and Legal before any future tracking feature	CBO Product	Open - carry forward
